

## PROPERTY PROTECTION

Empty or mothballed properties are often targets for theft and malicious damage. This targeting of unattended sites can lead to health and safety issues and large repair bills. Traditionally the protection of at risk assets has been achieved using conventional static guarding which is highly costly. By using modern technology and mobile response FM are able to provide a high level of flexible security for a fraction of the price of on site guards.

## ALARM RESPONSE

The 'FM Property Guard' is a simple cost effective solution to the problem of securing at risk property. By employing wirefree electronic detection and signalling equipment, optional 24hr alarm monitoring and mobile SIA incident response teams. FM are experts in providing flexible user friendly security solutions for the most demanding of applications. We specialise in Construction, Empty Property, Sub-Station, Roof and Remote site security.

## ALARM MANAGEMENT

Comprehensive alarm management and technical support is provided by FM ensuring a high level of security is maintained. Alarm activations are signalled directly to an Alarm Receiving Centre or via SMS text message directly to security or maintenance staff.

**Call or email for more information**

FM Security is a wholly owned subsidiary of FM Electronics Ltd. FM Electronics Ltd. has served the private and public alarm industry since 1992

## Fast Access Indication

Communication via SMS on GSM, TETRA & LANDLINE networks is possible wherever such networks exist

Using GSM & TETRA networks gives fast accurate information to the people at ground level enabling them to respond appropriately and quickly.

Information such as the location, time and nature of the security breach are provided through plain text allowing for simple easily understood messages to be received.

## About Us

FM are a specialist wire free alarm manufacturer operating inside the United Kingdom providing bespoke security solutions. We pride ourselves on our manufacturing build quality and unique on site development team which combine together to deliver powerful tools in the fight for better security.

Our Alarm Systems have been developed with rapid and reliable deployment in mind for the protection of personnel and property. Our systems are currently in use by over half of the UK Police forces and we also supply the Banking, Construction, Commercial & Residential sectors.
